

Request for DOPL Credits: 3 Core credits requested

Rocky Mountain Gas Association in partnership with the Utah Governor's Office of Energy Development, Rocky Mountain Power and Questar Gas is offering the following training:

Residential New Construction HVAC Training for Contractors and Builders

HVAC Contractors will learn about the newly adopted 2015 International Energy Conservation Code (IECC) which will take effect for new homes permitted July 1, 2016. Participants will learn what is needed to design and install residential heating and cooling systems that meet this new energy code and get a review of best practices for HVAC systems installed in new homes. The same information will be presented at both trainings.

10am-11:30am: Brent Ursenbach, Salt Lake County Energy and Mechanical Code Official and Past President of Rocky Mountain Gas Association Board of Directors. With over 30 years operating his own HVAC business and the past 10 years as a code official, Brent will provide a detailed review of 2015 IECC requirements.

11:30-Noon: Lunch provided by training

Noon-3pm: Dan Dearden, Owner of Just Right Heating and Air and former instructor and board member of Davis Applied Technology College and Fortis College. With a background of almost 40 years as an HVAC contractor, consultant and teacher, Dan will give a thorough overview of HVAC best practices along with the changes needed to design and install systems to meet 2015 IECC.

Dates:

Tuesday, May 17: 10am-3pm Questar D.N. Rose Building, 1140 W 200 S, Salt Lake City, UT 84104

Wednesday, May 25: 10am-3pm Questar D.N. Rose Building, 1140 W 200 S, Salt Lake City, UT 84104
